

COOL ENVELOPE

The flexible and economic solution for the dispatch of temperature-sensitive food products. The COOL ENVELOPE ensures customers receive products such as chocolate, fish and fresh meat always in a cooled condition.

The COOL ENVELOPE is available in different sizes and can be combined with cooling elements to provide a flexible solution for the dispatch of sensitive products under cooled conditions. The cold chain can be guaranteed for more than 24 hours using the COOL ENVELOPE along with the necessary number of cooling elements. The thermal coverings are available in different sizes and have been specially developed for parcel dispatch. They offer optimal utilisation of space and enable dispatch in a single package of both dry goods and goods requiring cooling. An adhesive flap provides easy handling and, when sealed, prevents unwanted air leakages.

Available in the following standard sizes:

- 25x18 (+5) cm
- 40x40 (+5) cm
- 60x40 (+5) cm
